

# Orthofix®

- ↪ Spelling exercise made easy
- ↪ Perfect spelling for everybody

## Orthofix® - a Part of a Whole

Orthofix® is an effective component of the Warnke® procedure that smartly paves the way to reliable spelling.

- ↪ as stand-alone software for learning visual spelling
- ↪ in combination with the WWTT (Wedemark Perception Selectivity Test) to strengthen the distinctive sound / syllable recognition
- ↪ as a part of the FLIC systems for learning foreign languages

Even better results may be achieved by integrating other exercise elements of the Warnke® procedure.

In case of questions please do not hesitate to contact us.

## Product Summary

Orthofix® provides the following:

- ↪ Computer-aided spelling exercise
- ↪ Establish unambiguous mental word images
- ↪ More than 10,000 exercise words to choose from
- ↪ You may randomly extend the exercise vocabulary
- ↪ German translation can be shown

5 minutes of exercising per day creates a visual storage of up to 10 new words per day. The current words demanded by the school may this way be quickly and permanently memorised. Forget about spelling troubles now.

One programme for three languages:

- ↪ German
- ↪ British English
- ↪ American English

## Dear parents, dear children,

Good spellers don't use rules, they trust rather in their mental word image. Think about it: If you, a good speller, are not sure how a word is written, then you write down both alternatives and 'see' which spelling looks right. You have an unequivocal mental image of every word and its individual letters.

But what about people who lack this capacity? They strive to reach their target with alternate strategies. Yet they fail to become really good spellers, in spite of often excessive exercising.

Good spellers don't use rules. Why should weak spellers learn them? *Orthofix*<sup>®</sup> shows the right way. Combined auditory and visual exercises disclose reliable spelling - letter by letter.

\*Personal data editorially changed

### *Orthofix*<sup>®</sup> for children

Parents and teachers more and more often report weak spelling of children - despite often excessive exercising. *Orthofix*<sup>®</sup> creates the essentials of a good speller: unequivocal mental word images. The writer sees at once whether the word is written as it was memorised in mind. A sophisticated educational procedure helps your child to playfully learn how to avoid the hardships of spelling - with joy and rewarding effort. ADS or ADHS children may terribly suffer at school, because in a class of 30 children or more they find focusing on the teacher and their task to be hard. BrainBoy<sup>®</sup> exercises the concentration capacity in playful manner, training mental functions that facilitate learning.

Jim Myers\*, Aberdeen

Our son Frank learnt writing at school according to the 'Write as you hear' system. The teacher requested us never to correct him. As a result, his orthography was poor. *Orthofix* helps Frank to learn ten new words every day. Now he 'sees' the proper spelling in his mind - and writes it down. Thank you!!

### *Orthofix*<sup>®</sup> for youngsters and adults

You do not outgrow spelling problems - young job starters often reveal poor spelling skills. *Orthofix*<sup>®</sup> helps even adults improve their spelling abilities quickly and permanently. Even if they are out of school, they may thereby achieve the level their everyday (job) life requires.

Tim Hood\*, Brighton

At school, correct spelling has never been important, due to a dyslexia diagnosis. Only many fruitless application tests made clear that I had no chance for a job without solid spelling. On the Internet I found a computer programme called 'Orthofix - playfully to successful spelling?' For me that has become true.

### *Orthofix*<sup>®</sup> for Learning Languages

*Orthofix*<sup>®</sup> is an important cornerstone of the FLIC foreign language exercise. *Orthofix*<sup>®</sup> discloses foreign languages to children and adults in a new and successful manner, whether standalone or combined with other exercise routines. Spelling and pronunciation may be precisely exercised with *Orthofix*<sup>®</sup>.

Jana Schmidt\*, Aachen (D)

Now my husband is a newly qualified primary school teacher. He could well use *Orthofix* in the special instructions. A colleague of mine works with children as an occupational therapist and is also interested in this software. I love the design of *Orthofix* and I am sure that other primary schools may be interested in this programme, too
